

Booking & Pricing Information

Laser Lipo is a noninvasive treatment that uses low-level laser therapy which causes the triglycerides within the fat cell to break down and release through fat cells. The fatty acids and glycerol are then expelled naturally through the body's own natural filtration system via the urinary tract and lymphatic system.

One hour treatment @ \$120 (per area)

3 one hour treatment package @ \$300

Ultrasonic cavitation is a noninvasive treatment that uses low ultrasonic waves to turn fat cells into fatty acids which are easier for the body to eliminate. This procedure is best used on stubborn/stored. It converts fat cells into liquid which can then be eliminated naturally through the body's own natural filtration system through the urinary tract and lymphatic system.

One hour treatment @ \$150 (per area)

3 one hour treatment package @ \$350

Skin tightening uses radio frequency energy to heat deeper layers of skin which stimulates collagen and elastin production in order to gradually reduce the appearance of fine lines. This procedure can be used on any area of the body.

One hour treatment @ \$150 (per area)

3 one hour treatment package @ \$350

Cellulite treatment uses a combination of procedures depending on the severity of the cellulite. This treatment breaks down the cellulite and fatty deposits. The treatments used include but not limited to ultrasonic cavitation, radio frequency, wood and vacuum therapy. After treatments, bruises are common. These fade with time.

One hour treatment @ \$150 (per area)

3 one hour treatment package @ \$350
